

ABSTRACT

5 A user-dedicated storage area (97) of a cellular
phone (10) is retained in a storage server (9) on a network
(6). Software purchased by a user via a sales server (12)
is not transferred directly to the user's cellular phone
(10) but is stored in the user-dedicated storage area (97)
of the user. The user downloads the software from his or
her own dedicated storage area (97) to his or her own
10 cellular phone (10) before using the software.
